ENGINEERING CYBERNETICS

Soviet journal of computer and systems science

CONTENTS FOR 1982

Number 1

	English Page	Russian Page
SYSTEMS ANALYSIS AND OPTIMAL CONTROL		
A.G. Kovalenko and V.R. Khachaturov: Algorithms for Solving Certain Problems of Optimization of Multistep Processes by the Approximating-Combinatorial Method. I	1	3
Yu.Ye. Malashenno and I.A. Ushakov: The Construction of Mathematical Models of Complex Technical Systems (Illustrated with an Example of a Communications Network) I. General Problems of Construction of Models of Complex Systems	14	18
Ya.I. Al'ber and S.V. Shil'man: A Unified Approach to the Problem of Minimizing Smooth and Nonsmooth Functions	21	26
A.O. Alekseyev: Increasing the Efficiency of Algorithms for Solving the Transportation Problem with Respect to the Time Criterion	28	34
A.V. Pokatayev: An Algorithm for Solving the Problem of Unconditional Optimization of Geometric Programming	32	39
V.N. Aptukov and A.A. Pozdeev: Some Minimax Problems of the Technology and Strengths of Constructions	39	47
K.I. Gordiyenko: Adaptive Control of Stock when the Distribution of Demand is Unknown	39	56
A.K. Balyko: A Problem of Stochastic Programming	43	61
R. Gabasov, F.M. Kirillova and O.I. Kostyukova: A Direct Exact Algorithm for Solving a Linear Optimal-Control Problem	50	68
V.I. Levin: On the Problem of Three Machines	57	76
QUEUEING AND RELIABILITY		
V.A. Nagonenko and A.V. Pechinkin: A Large Load in a System with Inverse Servicing and Probabilistic Priority	67	86
L.V. Nazarov and S.N. Smirnov: Servicing Orders Distributed in Space	74	95
V.Ye. Dikarev: A Model of a Centralized Technological Servicing of a Complex of Territorially Distributed Systems	78	100
A.G. Tatashev and S.Ye. Shibanov: Optimal Servicing Disciplines of a Nonhomogeneous Flow of Orders in a Single-Channel System of Mixed Type	86	108
G.L. Brodetskiy: The Efficiency of the Method of Organization of Storing Intermediate Results in Computer Systems	86	113
M.M. Mamazhonov; Optimal Plans of Continuous Sample Control for a Given Number of Testings	91	118
AUTOMATA AND COMPUTER SYSTEMS		
N.A. Starodubtsev: Autonomous Antitone Sequential Circuits. IV. Estimates of the Complexity	92	124

	English Page	Russian Page
G.S. Osipov: Two Problems in the Theory of Semiotic Control Models II. Semantic Analysis	98	131
V.V. Krylov: Construction of Real Time Processors on the Basis of Shifting Structures	105	138
B.V. Luk'Yanov: Calculation of Boolean Functions by Finding the Number of True Values of the Variables	108	142
S.G. Volchenkov: An Organization of Computations Utilizing Stack Storage	109	148
ARTIFICIAL INTELLECT AND ROBOTS		
P.D. Krut'kov and N.A. Lakota: Synthesis of Algorithms for Control of Robot Motion by the Method of Inverse Problems of Dynamics. Specification of Trajectories in Coordinate Form	116	154
N.N. Bolotnik and A.A. Kaplunov: Optimal Rectilinear Moving of a Load with a Two-Link Manipulator	121	160
B.I. Prokopov: Sequential Identification of the Parameters of Linear Systems in the Case of Incomplete Measurements	131	171
AUTOMATIC CONTROL		
G.P. Chigin and A.I. Silayev: Synthesis of Algorithms for Estimating the Parameters of the Vertical Motion of an Aircraft	132	177
S.L. Blyumin and V.V. Dariyenko: The Construction of Algorithms for Controlling the Motion of Linear Systems on the Basis of Solution of the Inverse Problems of Dynamics	132	189
V.P. Kolesnik and V.V. Solodovnikov: A Method of Synthesizing Time-Optimal Systems for Controlling High-Order Objects with Bounded Phase Coordinates. II. Synthesis of the Parameters of a Control System	139	195

Number 2

SYSTEMS ANALYSIS AND OPTIMAL CONTROL		
D.B. Yudin: Mathematical Programming in Order Scales	1	3
A.S. Nemirovskiy: The Unit-Vector Method of Smooth Convex Minimization	13	18
E.M. Vaysbord: On Optimal Solutions in Certain Hierarchical Games	23	30
D.V. Senchenko: On the Structure of Linear Connections of a Random Vector and Certain Problems of Dimension Lowering	27	35
A.G. Kovalenko and V.R. Khachaturov: Algorithms for Solving Certain Problems of Optimization of Multistep Processes by the Approximational-Combinatorial Method, II	28	46
P.S. Krasnoshchekov, V.V. Morozov and V.V. Fedorov: Internal Design of Technical Systems under Conditions of Uncertainty	36	56
Yu.V. Asaf'yev and G.P. Bubnov: A Model of Decision Making in the Case of Control of Air Traffic in a Regional System	43	63
R.A. Aliyev, V.P. Krivosheyev and M.I. Liberzon: Optimal Coordination of Solutions in Two-Level Control Systems	43	72
Ye.I. Gordiyenko: The Speed of Uniform Convergence of the Empirical Risk	50	80
V.N. Vladimirov and S.V. Yegorov: A Decomposition Method for Solution of the Bellman-Johnson Problem with Perturbations	56	86
RELIABILITY AND QUEUEING		
V.V. Kalashnikov: Organization of the Investigation of Complex Systems on the Basis of an Aggregate Approach to Modeling	61	92
E.V. Dzirkal: Statistical Monitoring with the Use of Confidence Limits in the Case of A Fixed Number of Observations	61	109
A.E. Shura-Bura: The Method of Sequential Optimization for Solving Problems of Optimal Multilevel Redundancy	66	114
Z.G. Garifullin: Determination of the Reliability Indices of Systems with Symmetric Graph of the Transitions	71	120

	English Page	Russian Page
V.A. Netes: The Use of a Linear Representation of the Efficiency Function for Calculating it	77	127
V.M. Abramov: Limit Theorems for Certain Joint Distributions of a Single-Channel System with Intensity of Servicing Dependent on the Queue Length	85	135
A.P. Goryashko: Some Results from the Synthesis Theory of Easily Testable Networks	85	139
V.V. Lipayev: Constructive Indices of Quality of Programs and the Connection with the Methods of their Development	96	151
V.A. Gorbatov and A.A. Kazanskiy: Characterization of Graphs Embedded in n-Cubes	96	163
V.A. Sokolov, M.G. Firdman and P.D. Shein: The State of the Art and the Perspectives of Development of Systems for Computer-Aided Design of Double-Sided Printed-Circuit Boards	103	171
THE ARTIFICIAL INTELLECT AND ROBOTS		
E.V. Popov: The Problem of Communication with Multifunctional Data Bases Using a Limited Natural Language	110	179
M.Vukobratovich and D. Stokich: Control of a Manipulator with the Use of Force Feedbacks	118	189
DATA PROCESSING		
S.D. Parondzhanov and E.M. Khazen: An Algorithm for Finding the Trajectories of Aircraft in an Automated Air Traffic Control System	119	195
V.A. Zentsov, S.F. Svin'in and V.B. Smolov: Approximation with Systems of Piecewise Polynomial Functions in Problems of Digital Signals Processing	126	202
AUTOMATIC CONTROL		
V.N. Bukov: Optimal Algorithms in Problems with Bounded Controllable Coordinates	133	210
BRIEF COMMUNICATIONS		
V.D. Poyurovskiy: The Use of Methods of Experiment Planning for Identification of Complex Objects	141	218
L.I. Feygin: Statistical Estimation of the Optimum in a General Schedule-Theory Problem	145	221
I.Ya. Akimova: The Problem of Optimal Arrangement and Generalization of a Theorem of Fejes-Tóth	149	224
N.I. Yanev: Minimization of a Pseudo-Boolean Maximum Function	149	228

Number 3

SYSTEMS ANALYSIS AND OPTIMIZATION		
A.D. Yudin: Informative Complexity of Statistical Systems	1	3
A.M. Rodionov: A Method of Synthesizing Linear Optimal Systems with Lag..	7	11
O.P. Burdakov: Conjugate Direction Methods for Solving Control Systems and Finding Saddle Points. I	13	17
L.Ye. Faybusovich: Wolfe's Algorithm for Infinite-Dimensional Quadratic Programming Problems	20	25
M.G. Teplitskiy: The Problem of Discrete Additive Programming	30	36
S.A. Kantsedal: Computational Algorithms for Solving Problems in Scheduling Theory	36	42
V.A. Korneyev and A.A. Melikyan: Optimal Synthesis in a Game Problem of Pursuit with a Small Parameter	45	52

	English Page	Russian Page
V.V. Fedorov: Iterative Cycles and Dialogue in the Automated Design Process	51	59
A.G. Sukharev: Optimal Methods of Solving Multicriterion Problems	58	67
Yu.Ye. Malashenko and I.A. Ushakov: On a Family of Mathematical Models for Preplanning Analysis of A Complex Technological System	63	74
RELIABILITY AND QUEUEING		
I.V. Pavlov: Construction of Sequential Confidence Intervals and Sets	71	83
Yu.K. Belyayev and A.P. Makarov: Unbiased Estimation of the Parameter of an Exponential Distribution	78	92
G.B. Rubal'skiy: Optimal Inventory Control with Random Replenishment and with Consumption Dependent on Availability	82	96
A.A. Shakhbazov: Limiting Distribution of the Time of First Entry for Semi-Markov Processes and Its Application in Reliability Theory	82	104
Yu.F. Yakushev: The Optimal Order of Servicing in Certain Multiphase Queueing Systems	91	114
S.N. Stepanov: Approximate Calculation of the Probabilistic Characteristics of a Completely Attainable Bundle	96	120
A.V. Makarichev: Optimum Servicing Disciplines in Queueing Systems with Losses	97	128
AUTOMATA, COMPUTING SYSTEMS, AND INFORMATION PROCESSING		
V.I. Varshavskiy, M.A. Kishinevskiy, A.R. Taubin and B.S. Tsirlin: Analysis of Asynchronous Logic Circuits. I. The Problem of Accessibility and Speed-Independent Circuits	105	137
B.A. Golovkin: A Comparison of Methods of Scheduling Parallel Computations in Multiprocessor Systems	116	150
B.P. Korobkov and L.A. Rastrigin: Randomized Methods of Partitioning Graphs. I	126	163
V.V. Matsello and M.I. Shlezinger: Syntactical Analysis of Images in the Case of Row Scanning	127	173
G.G. Minchev, M.G. Iliyeva, Kh.N. Peklivanov, M.V. Furnadzhiyeva, and T.G. Bozhkov, A Device for Object Identification Using Optical-Electronic Processing of Images	133	180
AUTOMATIC CONTROL		
P.D. Krut'ko and Ye.P. Popov: Analytical Construction of Optical Regulators and the Inverse Problems of Dynamics of Controlled Systems	135	182
A.B. Danilin and I.B. Yadykin: Suboptimal Control of Stochastic Dynamic Objects	135	194
BRIEF NOTES		
E.G. Davydov and N.I. Ringo: Some Questions in the Theory of the L-Problem of Moments	145	205
M.I. Revyakov and V.N. Fomenko: Estimation of the Reliability of a System from the Moments of the Distribution of an Output Effect	148	208
I.V. Medvedev: Construction of a Discrete Model Equivalent to a Differential-Difference Model	148	211

Number 4

SYSTEMS ANALYSIS AND OPTIMAL CONTROL		
S.V. Shil'man: Iterative Methods of Synthesizing Adaptive Filters with Finite Memory	1	3
V.N. Trishin: An Adaptive Algorithm for Solving the Multidimensional Knapsack Problem and Recognizing a Monotonic Boolean Function	9	11

	English Page	Russian Page
A.F. Shorikov: A Class of Nonlinear Multistep Problems of Control and Observation. I	17	19
O.P. Burdakov: Conjugate Direction Methods for Solving Systems of Equations and Finding Saddle Points. II	23	26
O.N. Khlebnikov: Choosing a Plan of a Reliable Object	32	34
L.K. Malozemova and I.M. Khurgin: Optimal Synthesis of Sharply Directive Antennas	43	44
M.Sh. Levin: Deterministic Planning Problems with Identical Processors and Simultaneous Appearance of Orders	49	51
A.A. Lanne and V.N. Malozemov: Optimal Synthesis of a Class of Nonlinear Circuits with Harmonic Inputs	56	58
QUEUEING AND RELIABILITY		
L.N. Polyayev: A Single-Line Queueing System with Exponential Bound on the Waiting Time	65	67
A.L. Konin and V.P. Mudrov: Use of a Linear Markov Model for Description of a Personnel Ranking System	71	73
V.V. Marbukh: Approximate Analysis of the Reliability of Renewable Systems Consisting of a Large Number of Elements with Dependent Failures	75	78
A.G. Tatashev: Optimal Strategy for Switching of Elements	78	81
AUTOMATA AND COMPUTER SYSTEMS		
V.I. Varshavskiy, M.A. Kishinevskiy, A.R. Taubin, and B.S. Tsirlin: Analysis of Asynchronous Logic Schemes. II. Attainability of Working States and the Influence of Lags in the Connecting Wires	81	84
V.V. Sapozhnikov: Synthesis of Structurally Integrated Testers for Self-Checking Automata	94	98
K.A. Naydenova: A Relational Model of the Analysis of Experimental Data	99	103
B.P. Korobkov and L.A. Rastrigin: Randomized Methods of Truncating Graphs. II.	115	120
V.A. Malyshev: Necessary Conditions for Existence of Programmed Manipulator Motions in a Tracing Problem	116	127
A.Sh. Koliskor, Ye.B. Lashko, B.I. Model', and B.L. Salamandra: A Regular Method for Derivation of Characteristics for Identification of Planar Objects	120	132
AUTOMATIC CONTROL		
S.V. Yemel'yanov, S.K. Korovin, and V.I. Sizikov: Control of the Free Motion of Dynamic Systems with Coordinate-Parametric and Parametric Feedback	125	136
V.I. Levin and Ye.Z. Perel'royzen: Analysis of Three-Dimensional Scenes Based on Dynamic Two-Dimensional Projections	134	144
V.I. Zubov: The Construction of Controlling Force Fields	142	153
A.S. Markelov: The Interrelationship of the Structure and Parameters of a Linear Automatic Control System with the Coefficients in the Laguerre Series Expansion of the Transfer Function	149	160
I.S. Gur'yev: Increasing the Efficiency of the Method of Sequential Decomposition for Solving Linear Estimation Problems	155	166
N.V. Kukharenko: Determination of the Weight Matrices of Functionals in Problems of Analytical Construction	161	173
R.T. Yakupov: Fast Solution of Discrete Matrix Riccati Equations in Optimal Control and Filtering	168	179
I.V. Kryukov and R.P. Stroganov: An Algorithm for Determining the Optimal Feedback in the Case of Incomplete Information Regarding the State	171	183

Number 5

REPRESENTATION OF KNOWLEDGE IN ARTIFICIAL INTELLIGENCE SYSTEMS		
G.S. Plesnevich: Representation of Knowledge in Associative Nets	1	6
V.S. Lozovskiy: An Extensional Data Base Constructed from Semantic Networks	14	23
A.S. Kleshchev and M.Yu. Chernyakhovskaya: Systems for Representation of Problem-Oriented Knowledge	30	43
V.N. Vagin and N.P. Viktorova: Questions of Structural Unification and Classification in Decision-Making Systems	46	64
S.K. Dulin: Investigation of Grids with Dissonances	54	74
LEARNING OF ASSIGNEMENTS IN ARTIFICIAL INTELLIGENCE SYSTEMS		
S.O. Varosyan and D.A. Pospelov: Nonmetric Spatial Logic	64	86
COMPUTER PROCESSING OF INFORMATION		
V.S. Fayn: New Aspects of Machine Understanding of Messages	77	100
V.S. Medovyy: Tuning Linguistic Processors	87	113
DEVELOPMENT OF ARTIFICIAL INTELLIGENCE SYSTEMS		
Yu.Ya. Lyubarskiy: Expressive Capabilities of the Dialogue Language in Automated Control Systems	95	154
V.Yu. Macherauskas: The Frame Model of Knwoledge in Quality Control Systems	106	166
BRIEF NOTES		
I.P. Kossey: Four Fast Algorithms in the Method of Resolutions	112	217

Number 6

V.A. Yemelichev, D.A. Suprunenko and V.S. Tanayev: On the Works of Belorussian Mathematicians in Discrete Optimization	1	25
L.G. Khachiyan: Convexity and Algorithmic Complexity of the Solutions of Polynomial Programming Problems	1	46
R.E. Lepp: Investigations of Estonian Scientists on Stochastic Programming	11	57
Yu.Yu. Chervak: Existence Conditions for Solutions of Lexicographic Optimization Problems	11	65
S.A. Aysagaliyev, B.I. Izteleulov and G.V. Kurbanova: Criteria for a Trajectory Entering a Stationary Regime in One Nonlinear Model of Development of a Multibranch Economy	17	72
E.G. Lange and A. Zhusupbayev: On Methods of Solving the Distribution Problem	22	79
K.R. Ayda-Zade and N.S. Sidorenko: One Approach to the Construction of Combined Optimization Algorithms	29	87
D.D. Lozovanu: Properties of Optimal Solutions of a Grid Transport Problem with Concave Cost Function of the Flows on the Arcs	34	94
V.-K.I. Karabegov: A Survey of Works on Optimization Methods and Their Applications That Have Been Produced in the Armenian SSR	38	99
A.A. Ashimov, A.M. Kunayev and D.Zh. Syzdykov: Application of the Method of a Common Parameter to the Identification of Complex Systems	39	103
P.M. Ivanov: Integrated Automatic Control Systems for Regional Agricultural-Industrial Complexes. Some Aspects of Design	46	112
O. Sakhobov: Two-Sided Reliability Estimates in a Standby Model with a Single Repair Unit for Different Servicing Disciplines	46	117
S.G. Khachikyan: Statistical Characteristics of Single-Nomenclature Storage with Random Demand and Fixed Supply Rate	52	124

	English Page	Russian Page
A.I. Usmanov: An Algorithm for Optimizing the Distribution of Channels in a Communication Switching Network	58	130
M.M. Larin: Unbiased Estimates of the Variance and Other Characteristics of the Inverse Normal Distributions	61	134
M.Z. Borshchevskiy, I.V. German and L.M. Shevchuk: Solution of Certain Planning Problems with Allowance for Indeterminancy	64	138
V.A. Vasil'yev and V.V. Konev: Sequential Estimation of the Parameters of Dynamic Systems When There Is Incomplete Observation	70	145
B.Sh. Aranavichyus: A Matrix Method of Solving the System of Differential Equations for Nonhomogeneous Markov Processes	80	155
D.Yu. Bulanzhe and B.G. Sushkov: Algorithms for Control of Computational Systems in Strict Real Time	84	160
COMPUTER SYSTEMS		
I.G. Biba, N.D. Vashchenko, N.I. Galagan and V.P. Gladun: Representation of Knowledge in Problem-Solving Systems	92	170
E.Kh. Tyugu: Computational Frames and Structural Synthesis of Programs	97	176
N.K. Bokhya, V.A. Gelovani, O.V. Kovrigin and N.D. Smol'yaninov: An Expert System for Diagnosis of Various Forms of Arterial Hypertension	102	183
M.S. Saparov: The Branch-and-Bound Method for Calculating Recurrent Functions Defined on Graphs	102	191
AUTOMATIC CONTROL		
S.V. Yemel'yanov, S.K. Korovin and B.V. Ulanov: Control of Nonstationary Dynamic Systems with Coordinate-Parametric Feedback	111	201
